260 Aldrich Hall, Irvine, CA, 92697

Internship Availability: 06/01/2027 – 09/30/2027 (any 10–12 weeks within this window)

RESEARCH INTERESTS

I am broadly interested in human–AI interaction, AI evaluation and benchmarking, and uncertainty quantification. I develop statistical and cognitively inspired methods to evaluate and improve AI systems. My work spans Bayesian and sequential evaluation of black-box LLMs for reliable, cost-efficient benchmarking; uncertainty calibration and how LLMs express certainty in natural language; and optimal task allocation across human and AI agents under real-world constraints. I design user studies on how AI assistance shapes human reasoning, learning, and reliance on deep learning systems.

EDUCATION

Ph.D. in Computer Science **09/2023 – Expected 06/2028**
University of California, Irvine
Advisor: Padhraic Smyth

M.S. in Computer Science **09/2023 - 03/2025**
University of California, Irvine | GPA 3.96/4.00

B.S. in Computer Science and Psychology with Honors **09/2020 - 03/2023**
University of California, Davis | GPA 4.00/4.00

RESEARCH EXPERIENCE

University of California, Irvine | Graduate Student Researcher **09/2023 – Present**
Computer Science Department; Advisor: Padhraic Smyth

- **Human–AI Interaction & Collaboration:** Led end-to-end study design and empirical analysis of user studies on how AI assistance shapes human learning, reliance, and decision-making; developed machine learning methods to optimally allocate tasks between humans and AI under real-world capacity constraints.
- **LLM Evaluation & Benchmarking:** Developed Bayesian and sequential evaluation frameworks for reliable, sample-efficient benchmarking of black-box deep learning models, including LLMs, with calibrated uncertainty; conducted large-scale empirical studies of how LLMs express uncertainty.

University of California, Davis | Research Assistant
Psychology Department 06/2022 - 03/2023

- Designed and implemented agent-based simulation models in Java to study how publication bias and research incentives inflate effect sizes, bridging computational modeling and behavioral science.

Animal Science Department 02/2022 - 05/2022

- Conducted data analysis and visualization in Python and R for genomics research publications.

FELLOWSHIPS & AWARDS

HPI Research Center Fellowship	01/2025
UCI ICS Dean's Fellowship	06/2024
Thomas E. Bruzzone Scholarship	12/2022
Charles R. Bishop Award	09/2022
2021 Michael's Scholarship	01/2022

SKILLS

- **AI & ML Methods:** LLM evaluation and benchmarking, uncertainty quantification and calibration, Bayesian inference, probabilistic modeling, sequential evaluation, human-in-the-loop task allocation, prompt engineering, and deep learning.
- **Empirical Research:** Experimental design, A/B testing, large-scale model evaluation, user studies and crowdsourced data collection, qualitative and quantitative error analysis, statistical modeling, and behavioral data analysis.
- **ML Frameworks:** PyTorch, Hugging Face Transformers, scikit-learn, Stan, and LLM APIs.
- **Programming:** Python, R, NumPy, pandas, matplotlib, C++, Java, Git, and LaTeX.
- **Languages:** English and Mandarin.

TALKS & PRESENTATIONS

Wu, S., Understanding Human–AI Dynamics in Interactive Decision-Making Tasks, *Collective Intelligence 2025 Demos and Posters.*

TEACHING

Student Assistant - UC Davis Computer Science Department **04/2022 - 06/2022**
Course: Software Development & Object-Oriented Programming in C++.

Peer Tutor – UC Davis Academic Assistance and Tutoring Centers **10/2021 - 03/2023**
Programming, mathematics, and statistics.
